CERTIFICATION IN ACCORDANCE WITH THE LATEST MACHINERY REGULATION

GOOD NEWS!

The new EU Machinery Regulation (EU) 2023/1230 further develops the safety requirements for machinery in the EU. Effective January 20, 2027, it will replace the previous Machinery Directive 2006/42/EC. The former U-Tech GSG 202A personal protection system remains a reliable safety solution. Its function remains unchanged: It continues to ensure the best possible personal protection within the danger zone of machines.
